This report will give a claim count by second physician name, sorted by name. It will also include the physician ID but will not include patient information.

# Data Analysis Report

Data Analysis Report, makes suggestions concerning the MRR and DR functions. It is also recommended that when choosing to run the MRR and DR processes, other facility users should not be in the system to avoid undesired results if records are locked by users and those same records need to be removed by the MRR or DR process.
